PROFILE

Engineering Result-oriented Frontend Developer with 2.6 years of professional experience in building responsive and high-performance web applications using React.js, JavaScript, and TypeScript. Skilled in managing application state with Redux, React Context API, and Mob X, and experienced in integrating RESTful APIs and Web Sockets for dynamic and real-time user interfaces. Hands-on expertise in developing secure, scalable solutions for both e-commerce and banking domains. Proficient with modern development tools including Rx JS, Axios, React Hooks, Webpack, GitHub, Jenkins, Docker, and AWS. Adept at working in Agile environments (Scrum, Kanban) with a strong focus on code quality and performance.

WORK EXPERIENCE

Lance Soft Engineering Pvt Ltd Software Engineer

Jan 2023 - PRESENT

- Assist in developing full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Build and integrate RESTful APIs and ensure smooth front-end and back-end connectivity.
- Collaborate with the development team to design user-friendly, responsive web interfaces.
- Write clean, maintainable, and efficient code following best practices.
- Assist in database management, including creating schemas, queries, and optimizations using MongoDB.
- Debug, test, and resolve software defects and performance issues.
- Participate in code reviews and contribute ideas to improve the project architecture.
- Learn and adapt to new tools, libraries, and frameworks as required by the project.
- Support in deploying web applications to cloud platforms like Heroku, Vercel, or AWS.
- Work closely with UI/UX teams to implement design improvements and ensure a seamless user experience.

EDUCATION

2018 - 2022

AL AMEEN ENGINEERING COLLAGE
B.E-Mechanical Engineering

7 . 7 6 C G P A

SKILLS

- HTML5
- CSS3
- Tailwind CSS
- JavaScript
- React.js
- Node.js
- Tailwind CSS
- Redux, Context
- Rest Api
- Axios
- Featch Api
- Firebase
- React Router
- Express.js
- MongoDB

TOOLS

- Visual Studio Code
- Post Man
- Git
- Github

PROJECTS

Project Title: **Digital Banking Platform**

Role: Frontend developer

Domain: Banking

Developed a modern digital banking platform enabling users to manage accounts, transfer funds, and monitor transactions in real time. Focused on user experience, security, and performance.

Key Features:

- User authentication and secure login using JWT
- Dashboard showing account summary, recent transactions, and analytics
- Fund transfers, bill payments, and scheduling features with form validations
- API integration for real-time data sync with core banking system
- Admin panel for managing customer queries and KYC verification
- Mobile-responsive design with accessibility support
- Unit testing with Jest and React Testing Library

Tech Stack:

Frontend: React.js, Redux, React Router, Tailwind CSS

API Integration: Axios, RESTful APIs

Authentication: JWT (JSON Web Tokens)

Testing: Jest, React Testing Library

Version Control: Git, GitHub

Tools: Figma (for UI design), Chrome DevTools

Methodology: Agile/Scrum

Project Title: **Insurance Management Platform**

Role: Frontend developer

Domain: Insurance

Designed and developed a multi-product insurance dashboard with claim submission and renewal features. Integrated secure payment gateways and third-party APIs for real-time data display. Implemented role-based access control for Admin, Users, and Agents.

Key Features:

- Policy browsing, comparison, and purchase with real-time premium calculation
- User dashboard showing active policies, upcoming renewals, and claim history
- Claim submission and tracking with document upload support
- Integration with payment gateways for premium payments and renewals
- Admin portal to manage policy types, user roles, and claims
- Responsive design with cross-browser compatibility
- Notifications for renewals, claim updates, and payment confirmations
- Role-based access for customers, agents, and admin

Tech Stack:

Frontend: React.js, Redux Toolkit, React Router, Tailwind CSS

API Integration: Axios, RESTful APIs

Authentication: JWT, OAuth2, role-based access control

State Management: Redux, Context API

Testing: Jest, React Testing Library
